DETAILED ACTION

1. This Office Action is in response to Amendment - After Non-Final Rejection filed 10/18/2007, which amended claims 1, 31-39, 42 and 45. Claims 1 and 3-46 are currently pending and have been considered below.

Allowable Subject Matter

2. Claims 1 and 3-46 are allowed. The following is an examiner's statement of reasons for allowance: The present application requires target and second and different entity pair variables. The pair variable represents interactions of two entities. The closest prior art, Gopinathan (U.S. 5,819,226) merges data but does not create an entity pair variable. The other close prior art, Prezioso (U.S. 5,577,169) does not teach said entity pair variable. Both prior arts, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Kessler (US 5,324,077) teaches a system that analyses medical data for fraud detection and where one of the profile variables obtained from said

analysis is multiple providers visit by the same patient for the same service or the same drug.

- Data Mining: Digging for Real Answers (Dialog file 13:00573973)
